Analyse the experience

Check for Alert

Report the status and incidents

THINKS

Pride for contributing safety from gas leakage hazards

Physical affects like environmental dust and water affects the system

Chart to analyse the durability of the components

HEAR

Get suggestions from experts

Compare with manpower & technology

Inspect the level of gas and take actions if necessary

SEE

Control air pollution

Usage of new technologies for better performance of the system

Detailed maintenance records

PAIN

- Chance of malfunction of the system.
- Industrialists being careless about gas leakage management.

GAIN

- Ensuring people's safety from hazardous gases.
- Fast response of the system.
